

Making Your Smart Controller a Simple Timer

When programmed properly, WeatherTRAK customers can reduce their water footprint dramatically and enjoy the benefits of lower water bills for as little as 13¢ per day (\$48 a year). Last year alone, WeatherTRAK subscribers collectively saved 6.7 billion gallons of water, 26.9 million kilowatt hours of power and 36.1 million pounds of carbon dioxide.

Because you chose not to renew your ET Everywhere subscription, you must now utilize your controller as a simple irrigation timer, scheduling your own watering days and times by programming the controller in **User-No ET** mode.

Here's what you need to do:

1. Turn the center knob to PROGRAM.
2. Turn the Upper Line knob one click to the right (clockwise).
The top line of the screen will display "**SET PROGRAM MODE STA 01**".
3. Turn the Lower Line knob to the right until "**User – NO ET**" displays.
4. Turn the Upper Line knob to the right until "**SET CYCLE TIME**" displays.
5. Turn the Lower Line knob to your desired run time per cycle.
6. Turn the Upper Line knob to the right until "**SET # OF CYCLES**" displays.
7. Turn the Lower Line knob to set your desired number of cycles to run.
8. Turn the Upper Line knob to the right until "**SET SOAK TIME**" displays.
9. Turn the Lower Line knob to set the soak time between the cycles.
10. Turn the Upper Line knob to the right until "**SELECT WATER DAYS**" displays.
11. Turn the Lower Line knob to select how often you want it to water.
12. Repeat steps 1 through 11 above until all stations of your landscape are being watered in User-NO ET mode.
13. Power cycle your controller by unplugging it and plugging it back in.

Do You Hear Beeping?

If your controller is beeping once every 30 seconds, please verify in the REVIEW screen that all stations show "User" or "U-NO" mode in the top right corner of the screen. Stations in "OFF" mode must also be in "User – NO ET" mode setting 0 minute cycle times.

Technical Support for Non-Subscribers

Technical support for non-subscribers is available for \$35/call. Please have your credit card ready when calling in. The Technical Support hotline number is found under HELP on the controller.
