WeatherTRAK.net 7.5

12/10/12

Products: All products using WeatherTRAK's Central Internet Management available at www.weathertrak.net

Summary

HydroPoint Data Systems, Inc., makers of WeatherTRAK, is pleased to announce the formal release of WeatherTRAK Central's WeatherTRAK.net 7.5.

WeatherTRAK.net 7.5 enhances the revolutionary Central Internet Management service with new security, reporting, and ease of use features as well as overall site enhancements. Enhanced security features include secure login and password recovery. WeatherTRAK.net 7.5 expands its easy-to-use interface by dynamically sizing web pages based on the browser screen size and adding user interface optimizations to our Preferences, Program and Report screens.

Overview

- WeatherTRAK.net 7.5, the third release in 2012, shows HydroPoint's commitment to continually enhance WeatherTRAK.net, listen to customer feedback and provide maximum value to our customers and users.
- WeatherTRAK.net 7.5 provides the industry's highest login and browsing security through 2048 bit secure socket layer (SSL) encryption. Users can now request their password directly from the WeatherTRAK.net login screen.
- WeatherTRAK.net 7.5 now dynamically resizes pages based on the browser screen size. This makes changing the browser's window size quick and easy without the need to refresh the page.
- WeatherTRAK.net 7.5 has an updated Controller Inventory report which analyzes all of the user's controllers and allows users to quickly determine controllers that may not have optimal settings. This report has been updated based on user feedback to include subtotals by account and analysis category.

- WeatherTRAK.net 7.5 optimizes its easy-to-use interface with the following features:
 - Preferences page – adds warning if user selects to be notified but does not have any alerts selected.
 - Program Page – automatically displays the station flow sub-section when the flow section is expanded.
 - Removes the week number column on the left of the calendar picker.
- WeatherTRAK.net 7.5 includes the following overall site enhancements:
 - Internet Explorer – Fixes issue with internet explorer if user does not have any controllers associated with their login.
 - Firefox version 16 – Fixes issue with Firefox version 16 or greater where Preference page did not save changes.
 - Manage Page - Eliminates rare instance where station preview shows zero runtime.
 - Home Page – Enables functionality to export Major Issues section via PDF or Excel.
 - Controller List Page – Resolves compatibility issue between rain pause and WeatherTRAK Smart Water Manager firmware 6.3.
 - Controller List Page – The Controller List Page now allows setting rain pause on over 300 controllers simultaneously.
 - Program Page – The Program page now immediately updates station flow section when the pump station is changed.
